Re: Old City of York Landfill

Dear Mr. Sutch:

I am in receipt of your letter dated November 2, 1990 regarding the monitoring well installation conducted on 15 and 16 October, 1990 and the sediment sampling performed on 30 and 31 October, 1990. In your letter you indicated that two modifications to procedures in the SOW took place with respect to the screening of the drill cuttings from new monitoring wells F, 9, and 10, and the decontamination of the drilling equipment used for installation of these monitoring wells.

I have discussed these modifications with Jay Newbaker, and we feel that they will not adversely impact any results generated by future testing of these wells and that such results will be acceptable to EPA.

At this time, I am unable to adequately respond to the sediment sampling portion of your letter until I verify the content with Bob Davis and Cindy Rice (US Fish and Wildlife).

If you have any questions, I may be reached at (215) 597-9562.

Sincerely,

John Banks
